Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-6 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-18 of copending Application No. 10017439. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claim(s) 1 through 18 of patent application #10017439 contain(s) every element of claim(s) 1 through 6 of the instant application and as such anticipate(s) claim(s) 1 through 6 of the instant application.

"A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or **anticipated by**, the earlier claim. *In re Longi*, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); *In re Berg*, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within that genus). " *ELI LILLY AND COMPANY v BARR LABORATORIES, INC.*, United States Court of Appeals for the Federal Circuit, ON

PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Menzies et al (U.S. 6,317,748).

5. As per claims 1 & 5 A method for accessing management information in CIM-format transferred by an agent in SNMP-format, the method comprising: receiving a data request from a CIM object manager including CIM data objects; mapping the data request into an SNMP request (col.12, lines 8-16); transmitting the request to the SNMP agent; and receiving a response to the SNMP request message from the SNMP agent (col.12, lines 17-30 & col.13, lines 61-65).

6. A method according to claim 1, the method further comprising: reading configuration information including SNMP session attributes, wherein transmitting requests to the SNMP agent and receiving responses from the SNMP agent is according to the session attributes (col.14, lines33-43).

Art Unit: 2143

7. A method according to claim 1, the method further comprising: mapping response data into the CIM data objects; and completing the data request including returning the CIM data objects to the CIM object manager (col.17, lines 17-30).

8. As per claims 4 & 6 A method for generating a MOF file from a MIB file, the MIB file including at least one SNMP variable, comprising: generating a MOF file for at least one of a group and a row sequence specified in the MIB file (col.2, lines 39-53), the MOF file including an object class; and generating a property and property qualifiers including an OID and SNMP data type for each SNMP variable in the MIB file for inclusion in the MOF file (col.2, lines 54-67 & col.13, lines 48-65).
